KLX Motor Mods.

CAMS

We recommend on valve adjustments that the intakes be set at .004 - .006 (inches). The exhaust valves to .005 - .008 (inches)

Cylinders

We recommend before installing the head gasket, that you apply a thin coat of 'Kawasaki bond' or '3M 1211' bond. These products can be found at most Kawasaki dealerships.

Torque Specs for the head are 34 ft. lbs.

The Cam tower bolts should be hand tight only.

Do Not surface the cylinders! We do recommend that you surface the cylinder head before installing

 Easy Break in with 2 warm up cycles.

 Make sure you hone the Cylinder.

 Use a 600 stone machine shop
